Aqua Safe Suit - Description

Protection Against Possible Injury from High Pressure Water Blasting

For added safety and personal protection, CESCO® recommends the **AQUA SAFE SUIT** series of PPE clothing and accessory products for water blasting. Made of UHP water resistant fabric, this apparel can provide chin to toe protection against possible injury from accidental high-pressure water streams associated with water blasting at pressures up to 25,000 and 40,000 psi. Durable multi-layered fabric provides protection and comfort while allowing unrestricted operator movement.

The Aqua Safe Suit features exceptional strength and durability, breathability, water and mildew resistance, and UV color retention. Suits are lightweight and flexible, and designed to retain their strength, dimensional stability, and color in severe conditions.

Aqua Safe Suits are available in a variety of coverage, size, and configuration options for safety, comfort, and mobility. Standard and custom sizes and configurations and in a wide variety of colors with your company logo. The jacket, bib overalls, and boot covers are available as a set or sold separately. Matching gloves are also available.

**Suits available for both
25,000 psi and 40,000 psi applications**

Aqua Safe Suit – Features

- **Rated for both 25,000 PSI or 40,000 PSI:**

Protection options for both 25,000 psi and 40,000 psi water blasting.

- **Fabric Characteristics:**

Designed to retain stability and color in severe conditions. Woven fiber Kevlar® cloth inner layers and durable, water resistant woven fabric outer layers provide a combination of abrasion resistance, high strength, flexibility, toughness, and thermal stability. Reflective tape banding provides high visibility.

- **Standard and Full Coverage Styles:**

Standard full protection multi-layer areas of coverage. Option for additional areas of full protection coverage.

- **Custom Size / Fit:**

Available in a variety of standard and custom sizes for comfort and mobility. Velcro closures and adjustable straps for a versatile fit.

- **Custom Colors and Logos:**

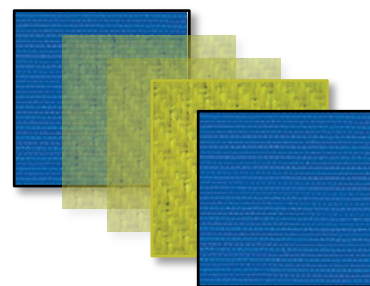

Standard Aqua Safe suits are a royal blue with yellow banding and our company logos. Also available in a wide variety of other colors and with your company logo.

Aqua Safe Suit – Coverage Options

Standard Coverage and Full Coverage suits are available in both 25,000 PSI and 40,000 PSI rating options.

Coverage is determined by the key areas of the suit that provide full protection for the rated pressure option. These areas of full protection have an increased number of Kevlar fabric layers sewn into the suit.

Full coverage suits provide additional areas of full protection not included in standard coverage suits.

Item	Level of Protection (by area)	Coverage Option
Jacket	Full protection on the entire front of the jacket and around the neck, shoulders, and forearms / wrists. Standard protection on the rest of the jacket.	Standard Coverage
	Also: Full protection on the entire jacket back panel.	Full Coverage
Bib Overalls	Full protection on the entire front of the bib overalls. Standard protection on the rest of the overalls.	Standard Coverage
	Also: Full protection down the entire backs of the legs.	Full Coverage
Foot Covers	Full protection on the entire foot cover (pair).	Standard Coverage
Gloves	Full protection on the entire back side of the glove (pair).	Standard Coverage
